

OSI PRECISION AC WATT OR VAR TRANSDUCER MODELS GW5-/GV5-

ACCURATE TO 0.2% OF READING

DESCRIPTION

The model GW5 Watt transducer provides real power measurements.

The Model GV5 VAR transducer provides reactive power measurements.

Accuracy, for sine-wave applications, is maintained to within $\pm 0.2\%$ of reading. Electrically isolated outputs are proportional to the instantaneous power averaged over several cycles.

Voltages up to 600V and currents up to 20A are directly connected to the transducer, thus eliminating the additional cost of current or voltage transformers. Currents from 20A to 200A are accommodated with external current transformers in either solid or split-core versions.

A wide variety of output types is available to allow interface with any data acquisition system from a simple recorder to computer, SCADA or PLC based systems.

Transducers are housed in a rugged metal can with barrier style terminal strips for I/O connections.

5 YEAR WARRANTY

APPLICATIONS

- Equipment monitoring for process control.
- Energy management / building automation.
- Sub-metering.
- Appliance testing.
- Monitoring of generation / co-generation systems.

FEATURES

- Accurate regardless of variations in voltage, current, power factor, or load.
- Available in 1, 1½, 2, 2½, or 3 element configurations.
- Provides Leading/Lagging VAR indication.
- Accuracy of $\pm 0.2\%$ Rdg. is maintained over a wide temperature range.
- Split-core CTs provide ease of installation.
- C of C with NIST traceability is available..

**Voltage specifications are line-to-neutral voltage.

*Denotes self-powered unit, limiting input voltage ranges to:

85-135 for 150Vac models

200-280 for 300Vac models

380-550 for 600Vac models

All others require 85-135Vac instrument power, 60Hz.

Optional 50ms output response to 90% - Add suffix "W"

Optional 230Vac instrument power - Add suffix "-22"

For UL Listed precision Watt transducers, see AGW Series.

50 HERTZ MODELS:

Add suffix "-50" to part number.

ORDERING INFORMATION

Example: Self-Powered, Three-Phase, Four-Wire, 120V, 5A Input with 0-±5Vdc Output, Proportional to 0-±1500Watts.

GW5-007CX5

ORDERING INFORMATION

Example: Self-Powered, Three-Phase, Four-Wire, 120V, 5A Input with 0-±1mAdc Output, Proportional to 0-±1500VAR.
